## What is GacoRoofFoam?

**GacoRoofFoam** is a sprayed-in-place closed cell polyurethane foam which bonds to any shape or size of substrate and becomes part of the structure, forming a seamless, monolithic barrier. It accommodates even the most unique roof designs and can be applied in various thicknesses to create a positive slope and improve drainage on flat roofs.

### The GacoRoofFoam Advantage

Seams, penetrations and parapet walls are the major source of leaks in most roof systems. **GacoRoofFoam** seamless, self-flashing roofing systems make these problems a thing of the past. When sprayed in place, the durable foam conforms and adheres to any shape or substrate.

### Eliminate Costly Tear-Offs

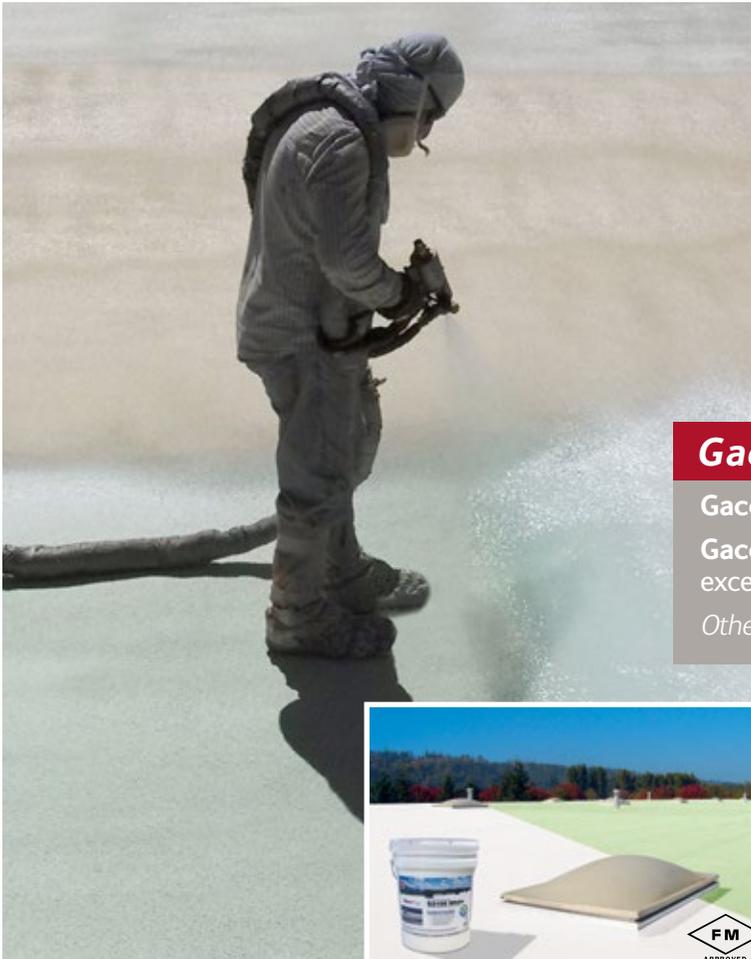

**GacoRoofFoam's** superior adhesion and light weight often allow the system to be applied over an existing roof, eliminating costly tear-offs and reconstruction. Besides saving money on labor and landfill costs, GacoRoofFoam can be applied during normal operating hours without interrupting opportunities for profit.

## Sustainable Insulation for Durable and Energy Efficient Roofs

*When properly maintained, a sprayed-in-place foam and coating roof is considered to be the only sustainable roofing system, meaning it will virtually last forever with periodic recoats.*

### Durable Elastomeric Coatings Add Value & Prolong Life

Foam is only half of the polyurethane foam roofing system story. A top coating is essential for fire resistance and protection from the elements. Gaco offers a wide variety of elastomeric coatings to fit various situations – and all integrate perfectly with the GacoRoofFoam roofing system. GacoFlex coatings form a tough, impenetrable membrane to effectively guard against sun, rain, wind and thermal shock.

### GacoFlex Silicone Coatings

**GacoFlex S20 Series** - Solvent-Free 100% Silicone Coating

**GacoFlex S2100** - Cleanable Solvent-Free Silicone Coating with exceptional clean-ability and whiteness retention.

*Other coatings available to meet individual project needs.*

### Severe Hail Rated

The GacoRoofFoam coated with GacoFlex S2100 Cleanable Solvent-Free Silicone Coating assembly successfully passed Severe Hail by FM Approvals. The roof assembly was rigorously tested to meet: hail, wind uplift, corrosion, foot traffic, leakage resistance and accelerated weathering performance.

### Energy Efficiency Saves Money

Improved thermal efficiency is a key benefit of using GacoRoofFoam – The higher R-Value of the system means that a properly installed and maintained roof will more than pay for itself as it generates energy savings year after year.
